EXPERIENCE

Gilded Goose Limited · Principal · Denver, CO · Remote **Apr 2024 – Present**

Business operations and marketing technology consulting for small shops looking to grow revenue and operate more efficiently. Simplify tech infrastructure management so founders can focus on their specialties.

- Recent client successes: new cases ↑ ~87% YoY; lead volume more than doubled; Search cost per call ↓ ~61%

Salesforce · Research & Insights, Sr Tech Operations Manager · Denver, CO · Remote **May 2021 – Apr 2024**

Owned the tech and tools roadmap across systems, vendors, licensing, and budgets, leading a geographically distributed, cross-specialty team of 7.

- Selected and stood up the systems, integrations, vendors, licensing, budgets, and project tools the team needed to run, with ROI and capacity estimates, enhancements, and process changes that cut cycle time
- Built out the PM and technology teams: portfolio-to-project visibility as a central source of truth; license management, training and enablement, and standardized Operations metrics
- Designed Salesforce CRM and ClickUp; led the Scrum team that built the integration for case intake, automated case satisfaction surveys, and clearer reporting so the PM tool and CRM could talk
- Built the Research Library and Vendor Scorecard on Salesforce CRM and Heroku, with Dropbox in the stack; cleaner asset data and automated scoring sped up funding decisions
 - Improved research asset data quality, security, and compliance, including proactive data safety measures for company, research, employee, and customer data
 - Introduced a near real-time Dropbox upload object and form to improve UX and distribution
 - Connected research deliverables to related objects like participants and vendors for advanced reporting, recruiting, and cost-efficiency analysis
 - Automated vendor engagement feedback and crowdsourced scoring so planning and funding decisions moved faster

Salesforce · Sr. Integrations Program Manager · San Francisco, CA **May 2019 – May 2021**

Led a team of 3 in Marketing Operations across campaign integrations, campaign operations, and knowledge management, covering training, UX, data quality, object governance, and reporting.

- Designed a multi-pronged Universal Content ID integration, creating a shared data ecosystem and taxonomy across Kapost, Mavenlink, Salesforce CRM, HighSpot, Widen, SmartLogic, SMARP, VidYard, Marketing Cloud, Allocadia, WordPress, and Google Analytics
 - Cut production cost and improved UX
 - Tracked the customer's digital content journey and made content ROI measurable across tools
 - Aligned content taxonomies with business owners across Kapost, Salesforce CRM, and Google Analytics
 - Delivered a single content repository, automated publication calendar, and clearer project visibility
- Directed internal health dashboards that monitored global marketing campaign health and helped recover unrecorded marketing-influenced pipeline
- Ran integrations end to end from scoping to adoption with business stakeholders, development teams, and agency partners so requirements, feedback, and delivery stayed aligned
- Mentored the team and supported career development through internal mentorship and internship paths; kept a roadmap so integrations lined up with the org V2MOM and cross-functional work shipped on time
- Expanded the Marketing Resource Site to enable 500+ stakeholders across 10+ departments, avg. 588 monthly users
- Certification: 2020 Trailhead Ranger

Salesforce · Marketing Campaign Operations Manager · San Francisco, CA **Feb 2018 – May 2019**

Worked with 40+ campaign strategy directors and team stakeholders across all global regions. Standardized UX, data governance, and the annual reporting hierarchy so shared reports stayed consistent.

- Designed and project-managed the implementation of an automated Global Campaign Audit, which prepopulated many records, automated workflows, flagged campaigns ineligible for Marketing Pipe, and alerted creators of corrections needed for hundreds of stakeholders, saving thousands of hours.
 - Year one: recovered \$1.3B in Marketing Pipe attribution and cut manual data-entry errors ~70%, ~\$45M/qt

- Improved infrastructure and simplified reporting so marketers used the tool to save time and gain recognition, with attributed spend and activity visible for budget conversations
- Improved campaign UX through data analysis and user research, and set data-quality standards with audit reports, visual controls, and automated audit tools for users
- Grew enablement from hands-on training into shared knowledge and self-service learning
 - Built the Marketing Resource Site as the team intranet for training and enablement so materials lived in one place and teams stopped hunting for answers
 - Adoption: users +88.9% YoY, unique pageviews +68.5% YoY, 6 regions globally, 13 teams' content, 23 contributors
 - Expanded team enablement to self-service training courses including Astro's Course Tracker for Campaigns, office hours, live sessions, and training videos. Reduced new-hire onboarding and training time from months to weeks.

90octane · Marketing Automation Manager · Denver, CO

Jan 2017 – Feb 2018

Agency marketing automation for midsize to enterprise clients across credit cards, banking, real estate, builders, and software. Scope shifted by account, from basic tech support through systems administration and setup.

- Helped evaluate tools for integration or use at client companies and contributed technical design for integrations, weighing fit against existing stacks, campaign needs, and admin burden before recommending adopt, integrate, or pass
- Administered Eloqua, Marketo, and Pardot, owning the platforms that powered scoring, nurture, and campaign operations, and worked in CRMs plus Zapier, Trello, and Monday.com tied to those client stacks
 - Built customized lead scoring models matched to each client's sales process
 - Designed lead nurture and generation journeys across the marketing automation stack
 - Recommended database segmentation, ran campaign execution and reporting, and kept data governance practices so list quality, fields, and handoffs stayed consistent
- Partnered with design and developers on scalable email and campaign templates; analyzed results and brought recommendations back to clients
- Planned how client marketing automation programs would scale as volume and complexity grew, and mapped systems transition paths when accounts moved platforms or needed cleaner handoffs between tools

Global Healthcare Exchange · Digital Marketing Analyst · Denver, CO

Jun 2015 – Dec 2016

Owned the marketing automation system, led the platform migration, and launched employee social media.

- Evaluated software and transitioned the company from Eloqua to Pardot, leading system migration and best-practice process setup across the stack
 - As Eloqua admin, streamlined Salesforce integration and raised average open rate to 38.7%, cut bouncebacks 2.7%, and lifted deliverability to 98.8%
 - Redefined the lead scoring model so qualification rules matched how marketing and sales used the data
 - Implemented Salesforce CRM integration for intake and campaign handoff to Sales and Client Enablement
- Built closed-loop reporting across social, digital ads, email, and Salesforce so campaign results tied to outcomes
- Designed and managed SEO strategy in BrightEdge
 - Drove YoY lifts of 192% direct traffic, 80% organic search, 102% new users, 86% pageviews, and 108% sessions
- Implemented an employee social media advocacy program in PostBeyond
 - Reached 100+ advocates, 9,000+ shares, 54,000+ interactions, and \$190,000+ earned media value in under 4 months
 - Grew social following 5x on Twitter and 3x on LinkedIn; ran paid search on Twitter, LinkedIn, and AdWords
- Trained 100+ people across Eloqua, Pardot, Hootsuite, PostBeyond, Twitter, and LinkedIn
- Certifications: 2016 Eloqua Master, 2016/2015 BrightEdge Master, 2015 Hootsuite Certified Professional

Return Path · Eloqua Marketing Automation Specialist · Denver, CO

Mar 2014 – May 2015

Jr. Systems Admin for Eloqua, supporting field, digital, and channel marketers on email and nurture.

- Led marketing automation for a company website rebranding and infrastructure update, including migration of lead intake onto the new stack
 - Owned the Eloqua cutover so rebranded sites and forms fed campaigns without dual backends
 - Transitioned backend intake and distribution onto the new infrastructure in under 3 months
- Ran QA on emails, landing pages, canvases, automation rules, and segments; supported list segmentation, cleansing, and de-duplication
- Supported global marketing teams with demand-generation and nurture campaign build and test, plus Eloqua documentation, process improvement, and training materials
- Provided technical support and training to global marketing teams on Eloqua
- Certification: 2014 Eloqua Master

Veeam Software · Internet & Email Marketing Specialist · Atlanta, GA

Jan 2013 – Feb 2014

Owned Veeam MarketReach, an in-house Partner Marketing automation tool for channel and Partner email.

- Grew active Partner participation from 3 to 50+ and supported 70,000+ Partner mailings through the ProPartner program, including competitions across Canada, the U.S., and LATAM
- Built and maintained 40+ localized email templates plus Partner support collateral, training and user guides, a self-training video, and competition pages so Partners could launch without starting from scratch

EDUCATION

University of Colorado Boulder · Master of Engineering Management

Aug 2015 – Apr 2021

University of Central Florida · B.S. Marketing with a Services Marketing Certificate

Aug 2011 – Dec 2012
